

Creating Engaging Activities with Lesson Activity Toolkit 2.0

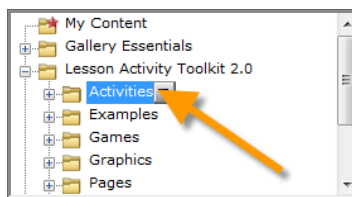

1. Open SmartBoard Notebook Software from the Novell Launcher.

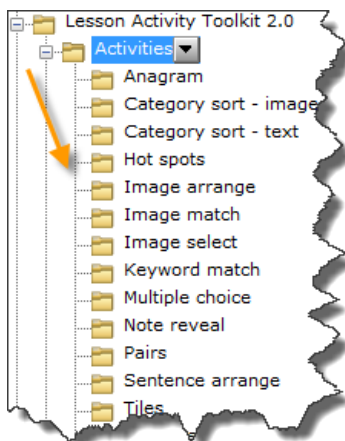

2. Click on the Gallery icon.

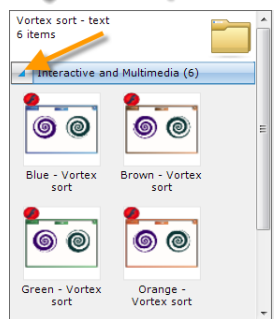

3. Click on the words "Lesson Activity Toolkit 2.0".

4. Click on the word "Activities". The folder will open showing various available activities from which you can choose.

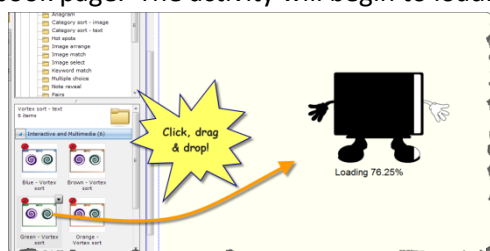

5. Click on the folder of your chosen activity.

6. Under the list of activities, click on the triangle icon next to "Interactive and Multimedia".

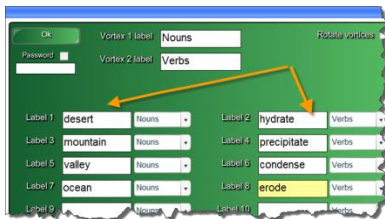

7. Click on the desired activity, then drag and drop the activity onto the Notebook page. The activity will begin to load.

Creating Engaging Activities with Lesson Activity Toolkit 2.0

8. Click on the EDIT button.

9. Enter desired text for your curricular activity.

10. If you want to protect your activity, check the password box and enter desired password.

11. When all content has been entered, click the OK button.

12. Go to File>Save to save the activity in desired location.

13. Test your activity. If any changes need to be made, start over at step 8.

14. Now you have an engaging activity for your students!
